Education

I.K.G. Punjab Technical University

Bachelor of Technology in Computer Science

Aug. 2023 – June 2027

CGPA: 8.50/10

Experience

Small Fare™

Dec 2025 – Present

Backend Developer Intern | Node.js, PostgreSQL, Prisma, Cassandra, Redis, Kafka, Docker

Hyderabad, Telangana

- Built scalable backend system for an event, ticket booking, Ticket Scanner platform - Events Fare.
- Implemented Webhook processings for multiple payment gateways, Redis caching, role-based access for users, organizers, admins.
- Developed modules include event management, booking, ticketing, payments and Ticket Scanner System
- Used Kafka for async processing and syncing Postgres with Cassandra as distributional db system architecture.

Wyreflow Technology | CRTD Technology

July 2025 – Oct 2025

Full Stack Developer Intern | Node.js, Express, MongoDB, React.js

Bhopal, Madhya Pradesh

- Built MERN-based job and career guidance platform with student, admin, and sub-admin modules.
- Implemented secure backend for authentication, job, career guidance posting-applying workflows, subscriptions.
- Integrated and worked on both backend, frontend services JWT, and Razorpay multirole access control.

Projects

InVolv IN | Github | Demo

December 2025

MERN, OAuth, Redis, Leaflet.js, Zustand, Firebase CM, Docker, Cloudinary, OSRM, ML/FastAPI(statsmodel), CronJob

- Developed a nearest-store product discovery multi role platform using MERN, Redis, Leaflet, and OSRM routing.
- Implementing real-time inventory visibility and ML-based demand forecasting for Stock analytics.
- Engineering a scalable system architecture with Redis caching, session handle, high-frequency search optimization.

Real-Time Device Tracker | Github | Demo

February 2025

Node.js, Express.js Socket.IO, Leaflet.js, EJS, Render

- Built a real-time multi-device tracking system using Socket.IO, for live location updates for unlimited devices.
- Integrated Leaflet.js maps to render device pins and continuously update latitude-longitude changes.
- Implemented bi-directional real-time communication and deployed the platform on Render.

E-Commerce | Github | Demo

December 2024

MongoDB, Express.js, React, Node.js, Redis, Razorpay, Tailwind CSS, Zustand, Cloudinary

- Developed full-stack e-commerce platform featuring an admin dashboard, product management (CRUD), and a secure checkout flow integrated with Razorpay API.
- Optimized performance using Redis to implement high-speed data caching for frequently accessed categories and product listings, significantly reducing database query latency.
- Implemented security including JWT-based authentication with refresh tokens, HTTP-only cookies, and Role-Based Access Control for admin-only dashboards.

Technical Skills

Languages: C++, JavaScript, TypeScript, Python, SQL (MySQL, PostgreSQL), HTML/CSS

Frameworks/Libraries: React.js, Node.js, Express.js, React Native, Zustand, Framer Motion

Backend/Cloud: MongoDB, Cassandra DB, Redis, Prisma, Kafka, Firebase, Docker

AI/ML & Data: Machine Learning, Data Analytics-Visualizations, Jupyter Notebook, Scikit-learn, Pandas, NumPy

Developer Tools: Git, Postman, Android Studio, VS Code, REST APIs, Cron, Webhooks

Relevant Coursework

- | | | | |
|-------------------|-----------------------|---------------------------|-------------------------|
| • Data Structures | • Machine Learning | • Artificial Intelligence | • Systems Design |
| • Cloud Computing | • Database Management | • Computer Networks | • Computer Architecture |

Achievements

- LeetCode: Solved 220+ problems, demonstrating strong proficiency in Data Structures & Algorithms.
- HackMol 6.0 and PSB Hackathon-2025 for building high-impact MVPs.
- Completed Training in Machine Learning via IIT Madras Pravartak, focusing on predictive modeling.
- Served as T&P Cell Coordinator and Core Member of E-Cell, managing campus recruitment and startup initiatives.
